

A Project Report on

# Gait Based Authentication System

Submitted in partial fulfillment of award of

**BACHELOR OF TECHNOLOGY**

Degree  
in

**Computer Science and Engineering**

By

**Vatsal Agarwal - (1308210118)**

**Vivek Kumar – (1308210121)**

**Vijay Bhasin – (1308210119)**

**Yash Agarwal – (1308210123)**

2013-2017

MR. VIKAS KUMAR  
ASSOCIATE PROFESSOR  
**Dept. of Computer Science & Engineering**

**Moradabad Institute of Technology**

**Dept. Of Computer Science & Engineering**  
**Moradabad (U.P.)**

**MORADABAD INSTITUTE OF TECHNOLOGY, MORADABAD**  
**Department of Computer Science & Engineering**

**CERTIFICATE**

Certified that the Project entitled “**GAIT BASED AUTHENTICATION SYSTEM**” carried out by **Vatsal Agarwal (1308210118), Vivek Kumar(1308210121), Vijay Bhasin(1308210119), Yash Agarwal(1308210123)** under my supervision has been successfully completed. It is recommended that the candidates may now be evaluated for their project work by the committee.

**Date:**

**Mr. Vikas Kumar**  
**Project Guide**  
**Associate Professor**

Dept. of Computer Science & Engineering

## **ACKNOWLEDGEMENT**

We would like to express my deepest appreciation to all those who provided me the possibility to complete this report. A special gratitude I give to our final year project guide, Mr. Vikas Kumar, whose contribution in stimulating suggestions and encouragement, helped us to coordinate our project especially in writing this report.

Furthermore we would also like to acknowledge with much appreciation the crucial role of the staff of CS&E Department, who gave their precious time and advice for the completion of this project. A special thanks goes to my team mates. Last but not least, we have to appreciate the guidance given by other teachers as well as the panels especially in our project presentation that has improved our presentation skills thanks to their comment and advices.

**Vatsal Agarwal (1308210118)**

**Vivek Kumar (1308210121)**

**Vijay Bhasin (1308210119)**

**Yash Agarwal (1308210123)**

## **ABSTRACT**

The purpose of this project was to develop a method for classifying cellphone users based on acceleration data. This paper presents a biometric user authentication based on a person's gait. Unlike most previous gait recognition approaches, which are based on machine vision techniques, in our approach gait patterns are extracted from a mobile device's accelerometer and evaluated against a machine learning model to identify person and compare various algorithms so as to obtain highest precision.
